# RYDERSHARE™: REAL-TIME VISIBILITY, EXCEPTION MANAGEMENT, AND COLLABORATION FROM END TO END

RyderShare™ is the only digital platform by a 3PL that provides a direct line of sight for goods moving through the entire supply chain—anywhere and anytime. As a result you get real-time supply chain visibility, exception management, and predictive analytics from end-to-end as goods move inbound on trucks to within the four walls of warehouses and distribution centers and, ultimately, outbound to their final destinations.

RyderShare™ eliminates silos and creates a virtual ecosystem that connects all parties involved in the supply chain. As a result, it provides turnkey solution that revolutionizes and transforms the way people and businesses collaborate throughout the supply chain journey.

With RyderShare™ you can:

- Track inbound stock in real-time, know with certainty when it hits the warehouse floor, exactly where it's staged, and when it's ready to move out.
- Digitize and automate workflows - Reduce redundant communication loops and tasks to empower your team to focus on the highest value actions.
- Communicate in real-time – Immediate communication and sharing to see and act on the full shipment lifecycle, from orders to cash.
- Implement changes with real operators - Managed by industry leading logistics professionals from Ryder, from implementation through execution.

Companies that use RyderShare™ achieved:

- Increased Productivity up to 50%
- Labor efficiency savings up to 50%
- Improved on-time performance of 99%
- Improved organizational reaction time by 90%

> " RyderShare has been a game changer for us. Tracking and tracing loads that used to take hours of phone calls and emails now takes minutes, and that enables our member-owned stores to better plan for on-time deliveries and for our teams to more efficiently manage their time. "
