

RYDERELECTRIC+™ ELECTRIFICATION JOURNEY

The ultimate turnkey fleet solution that navigates the electric vehicle (EV) landscape for you and provides all for one price:

Electrification Advisors

Vehicles

Chargers

Telematics & Technology

Maintenance

PHASE 1: FEASIBILITY STUDY

- Evaluate company's goals, sites, routes, and charging needs
- Assess vehicle fit – range, cargo capacity
- Deliver comprehensive vehicle report that identifies vehicles, routes and locations suitable for electrification

PHASE 2: ELECTRIFICATION STRATEGY

Determine optimal electrification conversion plan

Charging & EVCI requirements

Identify charging speeds and infrastructure needed

Maximize access to local, state, or federal grants & incentives

PHASE 3: IMPLEMENTATION PLANNING

Determine lease structure and financing options

Procure vehicles and charging infrastructure

Utility coordination and equipment upgrades

Right-of-way, permission, and permitting requirements

Construction and commissioning

PHASE 4: DEPLOYMENT

Vehicle delivery and charge management software installation

Driver orientation and training on EV best practices

Ryder maintenance shop onboarding

PHASE 5: ONGOING TRACKING

Preventive and corrective maintenance

Vehicle management and tracking

Ongoing vehicle, charging and electricity optimization

Scale for growth
